

PANEL TAPE INSTRUCTIONS

STAGE ONE

Ensure you are working on a flat surface and your space is clean and clear.

STAGE TWO

Make sure each of the four pieces of double-sided tape are the correct size for your frame, as displayed.

Peel back the adhesive layer of each piece and stick them to the inner four portions of the frame.

STAGE FOUR

When you are happy with the placement, peel back the exposed ends of the tape and gently press down each side of the panel so it is secured.

STAGE THREE

Partially peel back the top protective layer of the tape from each strip and fold 90 degrees, as displayed. Make sure you do not remove the whole top layer at this stage. Ensure the ends of the tape are outside the edge of the frame.

STAGE FIVE

Your panel is now securely fastened to your frame.
